Dear Shoshone County Solid Waste Customer:

Shoshone County will begin implementation of a Solid Waste Window Sticker Program.

The purpose of this program is to readily identify Shoshone County Solid Waste Customers and allow them access to the Solid Waste System. The windshield sticker allows the customer to dispose of waste at the transfer station and the rural sites.

Waste such as construction and demolition materials, roofing material, furniture, carpet and large bulky items are not covered under the residential solid waste fee. These wastes and other materials may be subject to additional charges. The Solid Waste Department can be contacted for a full list of materials subjected to additional charges.

To receive a windshield sticker, please complete and return the attached Window Sticker Program Application. Applications can be hand delivered, mailed, faxed or emailed.

Upon the completion of the Windshield Sticker Application, the Solid Waste Department will investigate and determine whether or not a parcel of property has been assessed a solid waste fee. If the property has been assessed a solid waste fee, and the fees have been paid, then the Department will issue two current year windshield stickers to the customer at no charge. An additional two stickers, above the two issued free, may be purchased at a cost of \$5.00 per sticker. It is established that the program will allow a maximum of four stickers per parcel. If a customer requires a replacement of stickers for any reason, a charge of \$5.00 per sticker will be assessed.

The windshield stickers are good for one year and will be distributed beginning January 1st of each year. Window stickers will be mailed to customers or be available at the Transfer Station after the application has been received. The windshield sticker should be displayed in the lower left hand corner of the windshield.

If you have any questions, please contact us at (208) 784-5190.
